

**Swissquote supports ETH information security research with CHF 2.5 million**

Swissquote, the Swiss leader in digital banking, is supporting the Zurich Information Security & Privacy Center (ZISC) at ETH Zurich with a CHF 2.5 million donation. The funding will strengthen research and education over the long term in the areas of information security, fraud prevention and data protection.

Cybercrime is evolving rapidly: new forms of AI-powered fraud are increasingly challenging financial institutions and other service providers. ZISC brings together researchers and industry partners to develop innovative technologies, methods and strategies to counter digital threats.

Swissquote's support will advance the development of new security solutions and accelerate the transfer of knowledge between research and practice. In doing so, Swissquote is making a significant contribution to building a trustworthy digital infrastructure and protecting sensitive data and assets.
